- Definitions of policy owner name, driver name and registered owner name: Defer to next meeting.

Motor Vehicle Information Technology (MVIT) updates:

- Security Certificates: Mani stated MVIT is still working with USAA and Progressive on the technical issues. They hope to have a solution in the next couple of weeks.
- 2-D Barcodes: Elena received the barcode information from Mani. Elena will meet with Doreen on how to get this information out to the insurance companies.
- Policy number changes (after renewal and other circumstances): Mani stated that the DMV will do periodic checks based on the policy number and VIN# through the web services. If the policy number changes what kind of response will we get back from the insurance company? Bill Hinds stated there are four mandatory elements: Policy number, NAIC code, VIN#, and date needed to verify insurance coverage. An option is to use reason codes to identify. This will give the state flexibility on what to confirm by.
- Updated timeline: Pilot phase will be in November 2009. One company will be used for the pilot phase and others will be added once the pilot program is a success.

Next meeting: February 25, 2009 10:00 a.m. Pacific Standard Time
