Western Recreationalist

**Dear, Western Recreationalist**

I am writing you in request of your help with mapping and economic impact of Off-Highway Vehicles as a fellow Outdoor Recreationalist. My task is to locate where you recreate in Nevada and see that it is mapped. Historic Right-a-Ways and Trails are a very important asset for Nevada as a whole.

Please help me locate and protect your recreational assets by emailing routes, trails, and roads within and connecting the state. I am very interested in your Gps Data, links to photos, travel stories, history and location of photos and of course history of the locations that you have enjoyed. I need to be able to contact you also if necessary; it will be very useful to know make and model of equipment used in regard to Gps too.

I personal most enjoy tough technical single track on a motorcycle but am looking for hiking and biking info as well. Rock Crawling and 4X4 need extra attention also.

Please email to [NV.OHV.Mapping@gmail.com](mailto:NV.OHV.Mapping@gmail.com) Please mail large files over 10megs.

Thanks in advance;

Gary Lambert  
Mapping and Economic Impact Chairman  
Nevada Commission on Off-Highway Vehicles
